

KEHR-BUFFALO WIRE FRAME CO., INC.
ROGERS INDUSTRIAL SPRINGS CO., INC.

Our E2 Industry Partner in **Metal Fabrication**

About KBWF:

Kehr-Buffalo Wire Frame puts more than 45 years of design and manufacturing experience behind its commitment to provide quality design, welding and production services to its Buffalo, NY customers.

KBWF's state of the art facility can handle both small and large jobs with the latest in welding technology, working with aluminum or steel sheet, plate, tubing angle or wire. Products include display tables and other fixtures for retail stores as well as produce and bakery outlets.

Why did KBWF Choose E2?

In 1999, "Y2K" was a concern to anyone with a computer, and Kehr-Buffalo Wire Fame was no exception. Not only did they have a mix of homegrown shop control and inventory software, but also their accounting software was not Y2K compliant.

KBWF Vice President George Rogers saw Y2K as an opportunity to replace all of his software packages with a single, all-inclusive system. He needed something that could cover quotations to shipped orders without multiple data entries; that could handle the large number of sub-assemblies his shop generated, and that would fit the budget constraints of a small business. After evaluating several options, George decided that E2 was the best fit for KBWF.

"After looking at several shop control systems, I knew what a system should do. E2 does everything I want, at a price that fits my budget."

The Results ... So Far:

After working with E2 Technical Support to implement the software, George Rogers describes E2's operation as "smooth". He has have been able to cut out multiple data entries, so re-orders are really quick, and can convert purchase orders to jobs in minutes. Data collection terminals keep much better track of time – no more "little pieces of paper"! Kehr-Buffalo Wire Frame produces a wide variety of products, and needed a comprehensive, flexible shop system to keep pace – E2 fits those needs, keeping the shop running smoothly, so KBWF can concentrate on keeping its promises of quality and on-time delivery to its customers.
